ART 4. SEMI AUTONOMY

The race is regulated by the principle of semi autonomy.

Semi-autonomy is defined as the ability of the member to proceed autonomously between a refreshment point and another for what concerns his food and liquid needs, as well as the needs that derive from environmental conditions or from unfavorable events such as problems physical or fatigue. It is important that the athlete is autonomous in the race course, knowing that he can, however, refer to several solid and liquid refreshment points and two Life Bases that will be communicated in the RoadBook.

This principle implies that:

- it is mandatory to bring with you all the material, different from race to race, indicated in art. 8 of these Regulations;
- the refreshment points will be supplied with liquids and solids;
- it is forbidden to be accompanied on the course by a person who is not regularly registered.

In any case, private assistance will be possible within 50 meters of the refreshment areas (and in any case within the areas determined by the organization), by a single person who must first identify himself with the managers of the refreshment point.

The life base is the place where the athlete can find a bag left with the organization upon delivery of the bib (to have their equipment in both bases it will be necessary to leave two bags). A hot meal, cots to rest and medical staff will be available in the life base.

The bags deposited in the life bases can be collected at the village of Saluzzo starting from 9.00 on Sunday.
